Read the prospectus carefully before you invest.

Past performance is no guarantee of future results. There is no assurance that the investment process will consistently lead to successful investing. Holdings are subject to change without notice. There is no assurance that the Fund currently holds any security mentioned herein.

An investment in the Fund involves risk, including the possible loss of principal and fluctuation of value. There is no assurance the stated objective(s) will be met. Additional risks associated with the Fund include, but are not limited to (greater detail on each of stated risks and additional risks may be found in the Fund's prospectus):

**Fixed Income Securities** and derivatives will fluctuate in value with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities and derivatives; on the other hand, if rates fall, the value of fixed income securities and derivatives generally increases.

**Foreign Investing** involves risks not typically associated with U.S. investments, including adverse fluctuations in foreign currency values, adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards.

**Derivatives** involve risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments, which could result in losses exceeding the original investment and magnified by leverage.

**Management** by the investment adviser may not produce the desired results, is no guarantee that the investment strategy will work as intended, and cannot eliminate the risk of loss.

**Limited History of Operations Risk and New Adviser Risk.** The Fund and its adviser are each newly-formed and have limited history of operations for investors to evaluate. As a result, investors do not have a track record from which to judge the adviser, and the adviser may not achieve the intended result in managing the Fund.

**30 Day SEC Yield** takes into account a fund's expense reduction, and reflects an estimated yield to maturity. It should be regarded as an estimate of the fund's rate of investment income, and it may not equal the fund's actual income distribution rate, which reflects a fund's past dividends paid to shareholders. The 30 Day SEC Yield with waivers is calculated in accordance with SEC standards.

**30 Day SEC Yield (Unsubsidized)**, does not take into account a fund's expense reduction, and reflects an estimated yield to maturity. It should be regarded as an estimate of the fund's rate of net investment income, and it may not equal the fund's actual income distribution rate, which reflects a fund's past dividends paid to shareholders. The 30 Day SEC Yield without waivers is calculated in accordance with SEC standards.

**Yield to Worst** is the rate of return generated assuming a bond is redeemed by the issuer on the least desirable date for the investor.

**Average Coupon** is the weighted average coupon, which is the average interest rate of the underlying securities held in the portfolio calculated by weighting each security's coupon rate by its relative size in the portfolio.

**FTSE 3-Month U.S. Treasury Bill Index** reflects the performance of short-term U.S. government debt securities.

**Standard Deviation** measures historical volatility. Higher standard deviation implies greater volatility.

**Sharpe Ratio** measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. A higher ratio means better return per unit of risk.
